**CITY OF NEWTON**  
**DEPARTMENT OF PUBLIC WORKS**  
**SPECIFICATIONS FOR CONTRACTED SNOW HAULING SERVICES**

**I. INTRODUCTION**

The City of Newton intends to contract for on-call snow hauling services on an hourly basis for snow hauling.

The types of equipment that may be required are attached hereto, and bidders should state in the space provided the number of such pieces of equipment available for each type and the applicable hourly rates for the 2013 – 2014 snow season. It is expected that the City will contract with multiple contractors. Contractors are not guaranteed that any actual work will be performed during the 2013 – 2014 snow season, and will only be paid if services are actually provided.

When the Commissioner of Public Works determines that hauling of snow is necessary, and that it is advantageous to call Contractors to perform snow hauling services, the Commissioner of Public Works or his designee will determine which types of equipment, and how many, are necessary to be used for the hauling operation. The contractor with the lowest hourly rate for each type of equipment will be called first. If that contractor has not contracted for enough pieces of equipment that the Commissioner has determined are needed for the hauling operation, or the Contractor notifies the Commissioner that it's equipment is not available for hauling operations on the dates and times the Commissioner determines that hauling is necessary, then the Contractor with the next lowest hourly rate will be called, and so forth until the Commissioner has secured the equipment necessary for the hauling operation.

If more than one Contractor has contracted with the City for the same hourly rate for a particular type of equipment, then the Contractor providing for the most available pieces of equipment of that particular type in their contract will be called prior to other contractors with fewer pieces of equipment of that particular type available under their contract.

**II. RESPONSIBILITIES OF CONTRACTORS**

A. Upon execution of contract, each piece of equipment contracted for hauling operations will be assigned by the Department of Public Works to a particular route or location. It is possible that not all pieces of equipment will be utilized during every event, and whether Contractors are called at all will be entirely dependent on weather conditions as they develop over the 2013 – 2014 snow season, and Contractors will only be called at times when the Commissioner of Public Works or their designee determines that hauling operations are necessary. Utilization of accepted equipment is at the discretion of the Commissioner of Public Works or their designee. All hauling operations will be completed in the sequence designated by the Commissioner of Public Works and/or his designee. It shall be the contractor's responsibility to become familiar and to familiarize any drivers, other than the contractor, with the route. Supervisory personnel of the Department of Public Works will be available to assist in this familiarization and to advise the contractor of any special conditions which may be encountered on the route.

B. Vehicles Inspection

1. The Contractor accepts full responsibility to schedule vehicle inspections at a City facility or at a location to be determined by the Commissioner of Public Works or their designee. The inspection will occur during a several week period designated by the City. Tentative plans are for this to occur between October 15 through December 1.
2. All paperwork related to vehicle inspections shall be sent to the Commissioner of Public Works or their designee at Newton City Hall, 1000 Commonwealth Ave., Newton Centre, MA 02459. The Commissioner of Public Works or their designee will subsequently contact responsive and responsible bidders to schedule the inspections. The contractor must schedule the inspections through the Commissioner of Public Works or their designee, either in writing or by calling **(617) 796-1634**. The inspections will take place Monday through Friday at the discretion of the Commissioner of Public Works or their designee. Failure to schedule inspection shall be deemed to be solely the fault of the contractor. The City will not assume any responsibility or liability for failure of the contractor to have the vehicles inspected.

3. The Vehicle at the time of inspection must fully meet all conditions set forth in this contract. All equipment must be inspected by DPW prior to acceptance. The Contractor's equipment must also pass inspection. If the equipment does not pass the inspection the first time, the contractor may modify the equipment and request a re-inspection or supply another piece of equipment after submitting necessary documentation to the Purchasing Agent and receiving authorization. However, in no event will a contractor be given a third opportunity to pass an inspection if either the original or the replacement equipment fails the second inspection.

- C. The contractor shall be responsible for all fuel, repairs and/or equipment and personnel necessary to operate the trucks or equipment and shall bear any and all risk of loss should personnel, trucks or equipment be injured or damaged while performing duties under the contract with the City.
- D. Equipment called in must arrive at its designated check-in Point within two hours of being called, or the City may contact the Contractor with the next lowest hourly rate for the type of equipment called.

This CITY-CONTRACTOR Agreement;

The City's Request for Bid #14-54 issued by the Purchasing Department, including the On-Call Snow Hauling Services,. Contract Terms And Specifications;

**GENERAL CONDITIONS**

The Schedule of Types of Vehicles and/or Equipment to be provided for in this contract, and the Contractor's priority<sup>1</sup> with respect to each is attached hereto, along with the number of such pieces of equipment available for each type and the

---

<sup>1</sup> Contracts were awarded in order or priority based on price, e.g., the lowest bidder for specified vehicle and equipment was awarded the principal contract, the second lowest the second priority, the third lowest the third priority and so forth. When the City needs a particular vehicle or piece of equipment, it will call the first priority contractor and, if it cannot provide what is needed, the second, and if it cannot provide what is needed, the third and so forth until the City can obtain the needed vehicle or piece of equipment.

applicable hourly rates for the 2013 – 2014 snow season. It is expected that the City will contract with multiple contractors. Contractors are not guaranteed that any actual work will be performed during the 2013 – 2014 snow season, and will only be paid if services are actually provided.

When the Commissioner of Public Works determines that hauling of snow is necessary, and that it is advantageous to call Contractors to perform snow hauling services, the Commissioner of Public Works or his designee will determine which types of equipment, and how many, are necessary to be used for the hauling operation. The contractor with the lowest hourly rate for each type of equipment will be called first. If that contractor has not contracted for enough pieces of equipment that the Commissioner has determined are needed for the hauling operation, or the Contractor notifies the Commissioner that it's equipment is not available for hauling operations on the dates and times the Commissioner determines that hauling is necessary, then the Contractor with the next lowest hourly rate will be called, and so forth until the Commissioner has secured the equipment necessary for the hauling operation.

It shall be deemed a breach of the terms of this Contract for the Contractor to fail to act in good faith and or to fail to take reasonable measures when determining that vehicles or equipment are not available. In that event the City shall have the right to by-pass the Contractor in order of priority in any future calls for vehicles or equipment.

If more than one Contractor has contracted with the City for the same hourly rate for a particular type of equipment, then the Contractor providing for the most available pieces of equipment of that particular type in their contract will be called prior to other contractors with fewer pieces of equipment of that particular type available under their contract.

#### RESPONSIBILITIES OF CONTRACTORS

- A. The Commissioner of Public Works or their designee will assign all routes and specific equipment as needed for hauling operations. It is possible that not all pieces of equipment will be utilized during every event, and whether Contractors are called at all will be entirely dependent on weather conditions as they develop over the 2013 – 2014 snow season, and Contractors will only be called at times when the Commissioner of Public Works or their designee determines that hauling operations are necessary. Utilization of accepted equipment is at the discretion of the Commissioner of Public Works or their designee. All hauling operations will be completed in the sequence designated by the Commissioner of Public Works and/or his designee. It shall be the contractor's responsibility to become familiar and to familiarize any drivers, other than the contractor, with the route. Supervisory personnel of the Department of Public Works will be available to assist in this familiarization and to advise the contractor of any special conditions which may be encountered on the route.
- B. Vehicles Inspection
  - 1. The Contractor accepts full responsibility to schedule vehicle inspections at a City facility or at a location to be determined by the Commissioner of Public Works or their designee. The inspection will occur during a several week period designated by the City. Tentative plans are for this to occur between October 15 through December 1.
  - 2. All paperwork related to vehicle inspections shall be sent to the Commissioner of Public Works or their designee at Newton City Hall, 1000 Commonwealth Ave., Newton Centre, MA 02459. The Commissioner of Public Works or their designee will subsequently contact responsive and responsible bidders to schedule the inspections. The contractor must schedule the inspections through the Commissioner of Public Works or their designee, either in writing or by calling **(617) 796-1634**. The inspections will take place Monday through Friday at the discretion of the Commissioner of Public Works or their designee. Failure to schedule inspection shall be deemed to be solely the fault of the contractor. The City will not assume any responsibility or liability for failure of the contractor to have the vehicles inspected.
  - 3. The Vehicle at the time of inspection must fully meet all conditions set forth in this contract. All equipment must be inspected by DPW prior to acceptance. The Contractor's equipment must also pass inspection. If the equipment does not pass the inspection the first time, the contractor may modify the equipment and request a re-inspection or supply another piece of equipment after submitting necessary documentation to the Purchasing Agent and receiving authorization. However, in no event will a contractor be given a third opportunity to pass an inspection if either the original or the replacement equipment fails the second inspection.

- C. The contractor shall be responsible for all fuel, repairs and/or equipment and personnel necessary to operate the trucks or equipment and shall bear any and all risk of loss should personnel, trucks or equipment be injured or damaged while performing duties under the contract with the City.
- D. Equipment called in must arrive at its designated check-in Point within two hours of being called, or the City may contact the Contractor with the next lowest hourly rate for the type of equipment called.
- E. All hauling operations shall be continued without interruption unless said interruption is authorized by the Commissioner of Public Works and/or his designee.

## OPERATIONS

- A. A City Snow Inspector shall be assigned to supervise contracted equipment. Each City Snow Inspector shall be responsible for a designated group of routes and/or locations. Planning operations shall be conducted in accordance with the direction of said Inspector and hauling operations shall be conducted in accordance with the instructions provided by the Commissioner of Public Works and/or their designee. In no instance shall a hauling operation be deemed complete until said City Snow Inspector has approved it.
- B. Equipment must check in and check out from its designated assignment location. Equipment must arrive fully fueled and ready to initiate hauling operations.
- C. Each piece of contracted equipment shall carry an identification plate provided by the Department of Public Works. Such identification shall be affixed to the appropriate vehicle throughout the contract period.
- D. All contracted operators must have access to a cell phone to both relay and receive information from the Commissioner of Public Works or their designee. An updated list of operator names with affiliated equipment and cell phone numbers must be provided by the contractor at each check-in. Contracted operators will be provided with a contact phone number to speak with the Commissioner of Public Works or their designee to address in-field issues.

## COMPENSATION

- C. The City reserves the right to reject any piece of equipment that does not pass City administered inspection and road tests and comply fully with this specification at any time during the term of the contract.
- D. The bid price shall include the cost of furnishing the operator, insurance, repairs, ballast, chains, fuel, oil, lubricants, and all other costs related to the operation of the equipment.
- E. Any additional types of equipment proposed for use under this contract must meet requirements and criteria as herein established and must also be individually approved by the Commissioner of Public Works and/or his designee.
